UNITED STATES ARMY PUBLISHING AGENCY, ALEXANDRIA, VA 22331-0302

00-2

Spring 2000

USAPA Realigns

On 18 Jan 00, the U.S. Army Publishing Agency (USAPA) realigned its structure to further the concept of a single Agency. This realignment initiative will promote efficiency in our core business processes and posture the organization to meet the future publishing needs of our customers. The new structure is a transition from six elements to four. Under the Office of the Director, the four elements are the Publishing Division; the Distribution Operations Facility; the Information Management Division; and the Plans, Analysis and Resources Division. The following is a list of the new agency structure. A phone list will appear on the last page, as usual.

Office of the Director

Publishing Division

Centralized Publishing Branch
Forms Publishing Branch
Decentralized Publishing Branch
Electronic Technology Branch

Distribution Operations Facility

Operations Branch
Material and Electronic Distribution Branch

Information Management Division

Systems Planning and Integration Branch
Office Automation/LAN Branch

Plans, Analysis and Resources Division

Plans and Analysis Branch
Budget and Administrative Support Branch

Customer Assistance

As with any action, the realignment of functions within USAPA caused changes in other processes. One change is customer assistance points of contact and the means customers have of securing answers to their questions.

Many questions customer may have can be satisfied by browsing the "FAQS Frequently Asked Questions" or the "News & Important Information" portion of the USAPA home page. The Internet address to access the USAPA home page is <http://www.usapa.army.mil>.

If the answer to your particular question cannot be found on the home page, please contact one of the following USAPA representatives:

Director's Corner

In the midst of all that's constant in our working lives, there is change—plenty of it. In our daily business alone, we've seen a tremendous change over just the past few years.

Advancing technology is the major influence of change in our business. Not only is new technology forcing us to view things differently, it is also forcing the publications proponents and users to do things differently. The challenge is to remember that while technology might show us how a process might be simplified at one level, it doesn't necessarily mean the same on another—at least not right away. That's because not all publications customers and stakeholders can implement a technology-driven improvement simultaneously. We all know what can happen when a process owner makes an improvement (a change) without consulting customers or stakeholders who have to implement the change(s).

Does technology make some positive improvements to the way publishing is done and official information is accessed? Yes. In fact, it

does and will continue to do so. USAPA is committed to electronic publishing. We believe that at some point it will be the predominant medium for accessing and distributing official publications and forms throughout the Army. But until we all "get there," a legitimate need for paper publications remains, even in units with sufficient automation. This is especially true for Army Reserve and National Guard units, where unit levels of automation may be lagging.

In the meantime, USAPA meets the challenging demand for electronic publications (and forms) and paper through our St. Louis Distribution Operations Facility by distribution of our Army Electronic Library (CD-ROM) and by making publications and forms available on our website at <http://www.usapa.army.mil>.

We need your feedback, not only about how we're doing, but also about the "system" and how it meets your needs. Your feedback is vital to alert us to any improvements we may need to make.

EMIL S. NAZZARO
Director

Unit of Issue and Footnote Codes

As you know, the Army and USAPA are transitioning administrative publications (ARs, Pam's, Cir's) and blank forms to a digitized (electronic) environment. Additional efforts are also underway to digitize many technical and equipment manuals (for example, TMs) and doctrine and training manuals (for example, FMs). These efforts are focused on making information available to you, the user, in a more timely and usable media format that meets the emerging requirements of the Army After Next.

To accomplish the necessary transition, from an historically-paper based medium to a predominately electronic based medium, requires some additional codes being developed for the Consolidated Index of Army Publications and Blank Forms (DA Pam 25-30).

When using the DA PAM 25-30 from our Army Electronic Library (EM 0001) or browsing the DA PAM 25-30 extract of items available for resupply at our website <http://www.usapa.army.mil>, you will find coding to help in identifying and ordering electronic publications.

Footnote Codes

Several footnote codes have been developed to

Media	Unit of Issue Code	Footnote Code	Note for CD-ROM Issuance
Paper Only	EA	—	
Paper & CD-ROM	EA	41	See title field for referenced EM number (Order as UI "CDROM")
Paper & Web	EA	41/ 45-49 (web address)	
Paper/CD-ROM/Web	EA	41/ 45-49 (web address)	See title field for referenced EM number (Order as UI "CDROM")
CD-ROM only	EMO*	42/	See title field for referenced EM number (Order as UI "CDROM")
WEB Only	EMO*	42/ 45-49 (web address)	
CD-ROM & Web	EMO*	42/ 45-49 (web address)	See title field for referenced EM number (Order as UI "CDROM")

*Publications with U/I Code of EMO cannot be ordered individually as "EMO."

identify certain characteristics of publications that have transitioned to electronic media.

- Footnote Code 41 (ITEM ALSO PRODUCED IN ELECTRONIC MEDIA) – This indicates that although the item is still in paper, it also is contained on a CD-ROM or one of the five official web sites. If the publication is on a CD-ROM, the title field will indicate (THIS ITEM IS INCLUDED ON EM XXXX). You may then order/subscribe to the EM on which the publication is contained. Remember, when ordering/subscribe to an EM, the UI (unit of issue) is "CDROM."

- Footnote Code 42 (ITEM ONLY PRODUCED IN ELECTRONIC MEDIA) – this indicates that the paper version is no longer available, but the publication/form is available on CD-ROM or one of the five official web sites.

- Footnote Codes 45-49 (These codes indicate the web addresses where the publications can be located). Footnote Code 45 (USAPA); Code 46 (TRADOC); Code 47 (LOGSA); Code 48 (Corps of Engineers); Code 49 (Surgeon General)

Each of these Footnote codes is searchable within the DA PAM 25-30. Following is a quick reference for use in identifying all of the possible ways a publication is available through the Army and the associated UI and Footnote codes.

Ordering Status Code

In order to identify publications that are stock out and the proponent has decided not to reprint, a status code of "PR" was developed. This status code means, "Proponent has chosen not to print/reprint this publication. For mission essential requirements, please contact the proponent agency Publications Control Officer." The intent of this code is to advise you that—

- The information contained within the publication is current and should be used if you have a copy of it.
- The item is not currently available in paper media from the USAPA Distribution Operations Facility. USAPA has exhausted our on-hand paper quantity of the item and are awaiting reprint authority from the proponent.
- We recommend you research DA Pam 25-30 (Army Index of Publications and Blank Forms) to determine if the item is available electronically to satisfy your need.
- If the item is not available via electronic media, you may want to contact your local installation Publication Control Officer (PCO) or your Publications Stockroom Manager for assistance. And in turn, they may want to contact their next higher headquarters for assistance in meeting your needs.
- The PCO, for the proponent agency/activity, will have limited ability to assist you in an emergency and does not stock publications.

The point of contact for this article is Mr. Robert Brooks at DSN 221-6221 or commercial (703) 325-6221.

Army Doctrine and Training Literature Program Update

The U.S. Army Training and Doctrine Command (TRADOC) staff is currently developing a

comprehensive plan for transitioning the full range of TRADOC-developed Army Doctrine and Doctrine Literature Program (ADTLP) products from a primarily paper-based distribution system to a primarily technology-based system.

While TRADOC has not yet made a decision to distribute any ADTLP products over only the Internet, this is certainly one of several options we are exploring. Resource constraints have forced the TRADOC staff to create and enforce a printing prioritization policy, which may indefinitely delay the reprinting of some older publications. This enables us to provide the field adequate accesses to new and significantly revised ADTLP products in a timely manner. Publication account officers are encouraged to access ADTLP products from the Dennis J. Reimer Doctrine and Training Digital Library at <http://www.adtdl.army.mil/addls.htm> or the USAPA home page at <http://www.usapa.army.mil/official>.

TRADOC is developing a transition strategy that will allow the Army to capitalize on technological efficiencies while enhancing unit readiness. This draft transition policy will be used to solicit informal major Army command (MACOM) comments. After analysis, TRADOC will refine the draft policy and submit it for Headquarters and MACOM staffing to ensure that all Continental United States and Outside Continental United States command issues are addressed.

In addition, TRADOC will continue to increase ADTLP access through fielding Distance Learning (DL) classroom, while providing print, CD-ROM, and DL support within available resources.

TRADOC looks forward to your continued support as we strive to meet future Army training and doctrine requirements.

The TRADOC point of contact is Mr. Rich Williams at DSN 680-5597, commercial (757) 728-5597, or e-mail Richard.Williams@monroe.army.mil.

USAPA's Quick and Easy Way to "Search" for Forms on Our Website

USAPA customers can quickly and easily retrieve forms by using the "Search For Forms" screen, located on the Electronic Forms Page of the USAPA website (<http://www.usapa.army.mil>). Why search through page after page for a form? By using this feature, you can retrieve the form you need in seconds.

To get to the "Search For Forms" screen on the USAPA website, select and click on "Electronic Publications and Forms." Once the next screen appears, click on "Electronic Forms." Another screen appears, with the words "Electronic Forms" and "SEARCH." Select "SEARCH" and click once. Another screen appears, displaying the "Search For Forms" window that allows you to type in the form number to search for. If the number is not typed in correctly, the result will be an "Unsuccessful Search."

The following example shows you the correct way to type in the number. For DA Form 2028 type "DA 2028." Do not type in the word "Form." You can also query for a list of all available DA, DD, SF, or OF forms by typing in the two letters (DA, DD, SF, or OF). After typing in the form number or other query, click the "Execute Search" button. If the form is available in electronic format, the form number will appear. You can open the form on screen (if you have the software installed on your PC and have the file extension associated with the software) or download and save it on your hard drive or a disk. Saving the form will allow you to open, fill-in, and print at your leisure without searching for it again.

You can also see what new forms have been added since the last quarter by typing in the word "NEW." You cannot use boolean operations (AND, OR, NOT), but you can use regular expressions for search criteria.

If you experience frequent timeouts when trying to open or download a form, contact your LAN

administrator or information management staff. Your system may not have accessibility at that time, or your browser's download time may need to be adjusted.

NOTE: Remember, you must have one of the forms software products installed on your PC to enable you to view, fill in, or print the form you select. If you do not have one of the form software products, you can download the Adobe Acrobat Reader (free of charge) from Adobe's website to access the .PDF version of a form. On USAPA's website select "Electronic Publications," then go to the "Download Software" area and select "Adobe Acrobat Reader." This will take you to the Adobe website. From there, select "Get Adobe Reader," and follow the directions to download the software to your PC. USAPA's .PDF forms can only be viewed or printed. They are not fillable forms.

If you are unable to find the form you need on our website, please be patient. We are presently converting all unclassified and nonrestricted Army-wide forms to electronic format. Upon completion, forms will be immediately added to our website for your access. We ask that you continue using our website and periodically check for the latest inclusions of Army-wide electronic forms.

The USAPA point of contact for this article is Ms. LaGreta Gibson at DSN 328-0501, commercial (703) 428-0501, or e-mail LaGreta.Gibson@usapa.army.mil.

Just In Case You Didn't Know

Department of the Army (DA) Form 374 (Department of the Army Job Description) has been rescinded and taken off the USAPA web site and the Army Electronic Library (AEL) CD-ROM. The rescission of the DA Form 374 is a change to AR 690-500, chapter 511.

In February 1999, the Office of the Assistant Secretary of the Army Manpower and Reserve

Affairs, Policy & Program Development Division, sent a memorandum to all MACOMs and OCONUS Civilian Personnel Operation Centers (CPOCs) announcing the elimination of DA Form 374. USAPA has therefore rescinded the use of this form and removed it from FormFlow and all other form application systems on our website and CD-ROM.

Job descriptions are now available through the Fully Automated System for Classification (FASCLASS), which has been implemented in all regions. New position descriptions will be submitted for processing via electronic format as a word processing document for loading into FASCLASS. Existing position descriptions may be printed from the FASCLASS website. If a job description is currently written on a DA Form 374, it remains in effect. You can view and access FASCLASS through Army Civilian Personnel Online (CPOL) at <http://cpol.army.mil>.

The USAPA point of contact for this article is Ms. Sylvia Hord at DSN 221-6293, commercial (703) 325-6293, or e-mail Sylvia.Hord@usapa.army.mil.

Reminder

PerFORM Pro forms files will be removed from the Army Electronic Library (AEL) and the USAPA web site as of June 2000. USAPA is now designing electronic forms in FormFlow 2.22 software. For those users desiring to upgrade to FormFlow 2.22, the Small Computer Program (SCP) office has a contract with Army users to purchase this software at a discounted price. If you are interested in purchasing this software, contact one of the following:

Small Computer Program (SCP) Office
Steve Mill at DSN 987-6786 or commercial (732) 427-6786
millers2@mail1.monmouth.army.mil or
Comark Federal Systems at 1-800-788-4688 or
tleskoski@comark-federal

The USAPA point of contact for this article is Ms. Shirley Fisher at DSN 328-0509, commercial

(703) 428-0509, or e-mail
Shirley.Fisher@usapa.army.mil.

Publications Server Upgrade

One of the servers on our website is dedicated to hosting the various electronic publications files (.PDF and .BOO formats) and forms files (FormFlow, PerFORM Pro, PDF, JetForm, and Novell InForm formats), which are available for downloading to your computer. We call this our publications server. For a period in January, a shortage of disk space on the publications server resulted in users having difficulty downloading electronic publications and forms files. We replaced the server with a newer, more powerful machine that has larger disks, giving us more than five times the hard disk space to store electronic publications and forms. For those interested in system specifications, the details about the old and new servers are below. As a result of this upgrade, users should no longer experience a file transfer error when trying to download a file.

Old server:

Pentium II CPU, 32 meg RAM, 2.5 gigabyte HD, CD-ROM, 10 Meg Ethernet link into a T-3 Circuit, Linux 2.0.36! (Red Hat 5.2 "Apollo")

New server:

Pentium III CPU, 128 meg RAM, 13 gigabyte HD, CD-ROM, 10 Meg Ethernet link into a T-3 Circuit, Linux 2.2.12-20! (Red Hat 6.1 "Apollo")

The USAPA point of contact for this article is Mr. Charles Palmer at DSN 328-0562, commercial (703) 428-0562, or e-mail Charles.Palmer@usapa.army.mil.

Order Processing/Customer Service at the USAPA Distribution Operations Facility

In April 1999, the USAPA Distribution Operations Facility (DOF) began processing orders on a

daily basis. Orders will now be picked and packed generally within 1 to 3 days of receipt.

Prompt, accurate ordering will eliminate the need for emergency requests. Special requirements for upcoming classes, inspections, fieldings, and so forth should be considered as normal requirements and orders submitted accordingly. Some special requirements do justify an emergency request. These orders, however, can be processed using the USAPA website Publications Ordering System and submitted as a regular resupply requisition. After ordering, please call the DOF Customer Service Representative (DSN 693-7305, ext. 266 or 268; or commercial (314) 263-7305, ext. 266 or 268) and explain the emergency requirement. The order will then be prioritized and shipped by United Parcel Service's 3-day delivery service.

The USAPA point of contact for this article is Ms. Sue Johnston at DSN 693-7305, ext. 250 or commercial (314) 263-7305, ext. 250.

Publications Account DA Form 12-R Update and Validation

The most essential element of customer satisfaction is ensuring that your order is processed as quickly as possible and shipped to you at the proper address. This can only be accomplished if all information provided on the DA Form 12-R (Request for Establishment of a Publications Account) is complete, current, and accurate. The account holder is responsible to ensure updates or validations are made to the DA Form 12-R to include:

- A yearly validation, through proper channels, including all blocks provided on the DA Form 12-R. These are pertinent to the processing of orders.
- A yearly validation of account address information. This can be verified by reviewing the last DA Form 12-R submitted or by calling the DOF Single Standard Account File (SSAF) point of contact. Information required for the validation is included in Blocks 1, 2, 3, 4, and 9. This

validation can then be faxed to the DOF.

- A change of address submitted as soon as possible to the DOF by completing Blocks 1, 2, 3, 4, 9, and 12 on the DA Form 12-R to ensure proper delivery and eliminate returns.

IMPORTANT: Please ensure your publications account has been approved to receive forms due to non-support by closed Army installation publication control offices. To obtain accountable forms, your authorization classification level must be at least CONFIDENTIAL.

Addresses should only consist of four lines to be constructed as follows:

- The 1st line should be addressee.
- The 2nd line should consist of the ATTN line or office symbol.
- The 3rd line or 2nd to the last line must include a delivery address such as a street or building number (as on a military installation).
- The 4th line should include the city, state, and 9 digit zip code.

P.O. boxes may only be used *with approval* from the SSAF POC when there is no optional point of delivery. The address must include a delivery address (such as a building number). The 2nd line of the address would consist of the P.O. Box number, the 3rd line, the delivery address.

Validations, address changes, or questions concerning the completion of the DA Form 12-R can be directed to the SSAF point of contact, Ms. Mary Pople at DSN 693-7305, ext. 221; commercial (314) 263-7305, ext. 221; fax DSN 693-7395; or fax commercial (314) 263-7395.

The USAPA point of contact for this article is Ms. Mary Pople at DSN 693-7305, ext. 221 or commercial (314) 263-7305, ext. 221.

Government Bills of Lading

In 1996, the U.S. Army was designated the single Department of Defense (DOD) activity authorized to stock and distribute hard copy Government Bills of Lading (GBLs). USAPA was designated the Army agency for controlling numbered GBLs,

which includes accounting for each numbered GBL. New procedures that required customers to establish a special GBL "Y" account before an order was processed to ensure only authorized activities are able to requisition GBLs. Orders placed using any account other than the assigned GBL account were rejected with a D8 status code to the customer (account not authorized to request GBLs). Requests to establish an account must be submitted to the Distribution Operations Facility, using DA Form 12-R, *Request for Establishment of a Publications Account*. The DA Form 12-R **MUST** include the GBLOC in block 7b. Questions, validations, or address changes concerning the completion of the DA Form 12-R can be directed to the Single Standard Account File (SSAF) point of contact, Ms. Mary Pople at DSN 693-7305, ext. 221; commercial (314) 263-7305, ext. 221; fax DSN 693-7395; or fax commercial (314) 263-7395.

A DD Form 448, Military Interdepartmental Purchase Request (MIPR), must be completed at the headquarters level for each Service at the beginning of the Fiscal Year (FY). Funds must be available before an order can be processed. Established account holders should verify that a MIPR has been processed at USAPA for their Service or agency prior to submitting an order. Additionally, remaining funds are returned to the Service provider at the end of each FY. Customers should process orders prior to year end cut-off of current FY funds (mid-September) and ensure sufficient quantities are ordered to support requirements until additional funding is received (1st Quarter of next FY). Orders will be rejected "GF" status if funds are not available.

Questions pertaining to fund availability can be directed to the USAPA point of contact, Ms. Donna Harding at DSN 693-7305, ext. 215 or commercial (314) 263-7305, ext. 215.

ETMs Available Through Resupply

Here is the latest list of ETMs that have been produced by the U.S. AMC Logistics Support Activity. All of the products listed below are now

available for requisitioning through normal resupply channels. So that you receive future revisions, we're providing the initial distribution number (IDN) for each product. Please submit your DA 12-Series subscription requirements now. Just cite the IDN and the quantity you require.
